

BP3337E is a high PF PSR constant current LED driver with high current accuracy. It is suitable for 90Vac-277Vac universal input.

BP3337E achieve high PF by constant on time control. With internal THD optimizer, the THD of input current can be further reduced. BP3337E works in BCM mode, which can help to improve switching loss and EMC performance.

BP3337E adopts DIP-7 package.

- 90-277Vac universal input
- High PF low THD (PF>0.9, THD<15%)
- Support two-winding design for isolated application
- High accuracy of current reference (+/-3%)
- Good line and load regulation
- Critical conduction mode
- Low operation current
- VCC UVLO
- Cycle by cycle current limitation
- Output open/short protection
- Thermal fold back
- DIP-7 package
