

BP3337E is a high PF PSR constant current LED driver with high current accuracy. It is suitable for 90/ac-277/ac universal input.

BP3337E achieve high PF by constant on time control. With internal THD optimizer, the THD of input current can be further reduced. BP3337E works in BCIVImode, which can help to improve switching loss and EWC performance.

ry

BP3337E adopts DIP-7 package.

e

m

- 90-277Vacuriversal input
- High PF lowTHD (PF>Q9, THD<15%)
- Support two-winding design for isolated application
- High accuracy of current reference (+/-3%)
- Geod line and load regulation
- Critical conduction mode
- Lowoperation current
- VCC UVLO
- Cycle by cycle current limitation
- Output open/short protection
- Thermal fold back
- DIP-7 package
